Statu

Perio

- 2a) This action is FINAL.
- 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 39-79 is/are pending in the application.
 - 4a) Of the above claim(s) _____ is/are withdrawn from consideration
 - 5) Claim(s) is/are allowed.
 - 6) Claim(s) 39-79 is/are rejected.
 - 7) Claim(s) _____ is/are objected to. 8) Claim(s) are subject to restriction and/or ejection requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on 18 November 2003 is/are: a) ☐ accepted or b) ☐ objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1,85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of:
- 1. Certified copies of the priority documents have been received.
 - Certified copies of the priority documents have been received in Application No.
 - 3 Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

 The examiner construes the phrase "about 0" in instant claims 39, 42, 43, 60 and 73 to mean numbers that are larger than zero, and numbers that include zero.

Therefore, since "about 0" includes zero, the examiner asserts that the limitations that follow the phrase "about 0" are optional.

Claim Objections

2. Claims 39-59 are objected to because of the following informalities:

In instant claim 39, a space should be inserted between the greater than or equal to symbol and the number one.

Instant claims 40-59 are objected to for being dependent upon a claim with the above addressed objection (i.e. claim 39).

Appropriate correction is required.

Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
 The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant repaired as his invention.
- Claim 64 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 64 recites the limitation "wherein the polymer additive" in lines 1-2. There is insufficient antecedent basis for this limitation in the claim. The examiner suggests that instant claim 64 should be amended to depend from claim 63 to provide proper antecedent basis. Appropriate correction and/or clarification is required.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy go policy reflected in the statute) as as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See In re Goodman, 11 F. 34 1046, 29 USPO24 2010 (Fed. Cir. 1983); In re Longi, 799 F.24 887, 225 USPO24 2010 (Fed. Cir. 1983); In re Longi, 799 F.24 887, 225 USPO24 50, 124 (2014). The Word of the Cir. 1985; In re Norman, 896 F.24 393, 724 USPO 781 (CCPA 1982); In re Vogel, 422 F.24 438, 164 USPO 619 (CCPA 1970); and, In re Thorington, 441 8.24 529, 183 USPO 644 (CCPA 1980).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 39-79 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-41 of U.S. Patent No. 6,525,015. Although the conflicting claims are not identical, they are not patentably distinct from each other because Man et al, U.S. Patent No. 6,525,015, claims a similar alkaline detergent composition and a method for removing soil from an article with an alkaline detergent composition comprising an effective soil removing amount of a source of alkalinity, an alkyl optional confliction of the confliction of the

surfactant, and adjunct ingredients (see claims 1-41 of Man et al, U.S. Patent No. 6,525,015), as required by applicant in instant claims 39-79. Although Man et al, U.S. Patent No. 6,525,015, discloses a similar composition, they are not identical, because Man et al, U.S. Patent No. 6,525,015, requires an alkyl polyglycoside surfactant (see claims 1, 22 and 35 of Man et al, U.S. Patent No. 6,525,015), whereas the instant claims require a nonlonic surfactant. Therefore, claims 39-79 of the instant invention are an obvious formulation in view of claims 1-41 of Man et al, U.S. Patent No. 6,525,015.

8. Claims 39-79 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-42 of U.S. Patent No. 6,369.021. Although the conflicting claims are not identical, they are not patentably distinct from each other because Man et al, U.S. Patent No. 6,369.021, claims a similar alkaline detergent composition and a method for removing soil from an article with an alkaline detergent composition comprising an effective soil removing amount of a source of sikalinity, an alkyl polyglycoside surfactant, a nonionic surfactant, a silicone surfactant, and adjunct ingredients (see claims 1-42 of Man et al, U.S. Patent No. 6,369,021), as required by applicant in instant claims 39-79. Although Man et al, U.S. Patent No. 6,369,021, discloses a similar composition, they are not identical, because Man et al, U.S. Patent No. 6,369,021, trequires an alkyl polyglycoside surfactant (see claims 1, U.S. Patent No. 6,369,021), whereas the instant claims 19-79 of the instant instant claims require a nonionic surfactant. Therefore, claims 39-79 of the instant invention.

Art Unit: 1751

are an obvious formulation in view of claims 1-42 of Man et al, U.S. Patent No. 6 369 021.

9. Claims 39-79 are rejected under the judicially created doctrine of obviousness-

type double patenting as being unpatentable over claims 1-40 of U.S. Patent No. 6,649,586. Although the conflicting claims are not identical, they are not patentably distinct from each other because Man et al, U.S. Patent No. 6,649,586, claims a similar alkaline determent commostition and a method for removing soil from an article with an

alkaline detergent composition and a method for removing soil from an article with an alkaline detergent composition comprising an effective soil removing amount of a source of alkalinity, an alkyl polyglycoside surfactant, a nonionic surfactant, a silicone surfactant, and adjunct ingredients (see claims 1-40 of Man et al, U.S. Patent No.

surfactant, and adjunct ingredients (see claims 1.40 of Man et al, U.S. Patent NO. 6,649,586), as required by applicant in instant claims 39-79. Although Man et al, U.S. Patent No. 6,649,586, discloses a similar composition, they are not identical, because

Patent No. 6,649,586, discioses a similar composition, they are not identical, because Man et al, U.S. Patent No. 6,649,586, requires a surfactant containing a sugar ring (see claims 1, 21 and 34 of Man et al, U.S. Patent No. 6,649,586), whereas the instant claims require a nonionic surfactant. Therefore, claims 39-79 of the instant invention

claims require a nonionic surfactant. Therefore, claims 39-79 of the instant invention are an obvious formulation in view of claims 1-40 of Man et al, U.S. Patent No. 6,649,596. 10. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brian Mruk whose telephone number is (571) 272-1321. The examiner can normally be reached on Monday-Thursday from 7:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yogendra Gupta, can be reached on (571) 272-1316. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.
